PROTEST AT LAY-OFFS
PACKARD ELECTRIC

Schramm and some of his European pals are planning to visit this factory today. We represent a group of workers who are known to you all as the "48" - laid off in April 1994 and promised our jobs back in April 1995.

The purpose of our protest today is to highlight the injustice that has been done to us. The Labour Court have left us waiting around for their decision and this week told us that the company were not in a position to re-employ us or to give us decent redundancy. The Court is completely on their side.

But our plight is only the tip of the iceberg. This company who have made millions in the last few years, intend to lay off hundreds of more workers and give them the same treatment we got.

It's time our unions stood up to them. We have been treated disgracefully and you will get the same. Show your support for our protest. Demand that the union call meetings, organise an overtime ban and show some bottle before we are all sold down the river. There is work here for everybody if people didn't have to work a 41 hour week and if there was a ban on overtime.

WE NEED YOUR SUPPORT AND SOLIDARITY
